Preliminary Inspection

An inspection was conducted on the 21st December 2021 at the above school. In summary, no major pest issue was found during the time of inspection.

We would like to highlight at the several locations that might become potential pests' habitat and some necessary precautions are needed for preventive measures in the future. Please find the following findings as below:

Location: Perimeter Drain

Findings & Recommendation:

1) Spotted chocked drains with accumulation of water and sand particles that might become potential mosquitoes breeding.
2) Kindly maintain well the housekeeping and clean up the sand particulars for preventive measures.
