Preliminary Inspection

An inspection was conducted on the 17th December 2021 at the above school. In summary, no major pest issue was found during the time of inspection.

We would like to highlight at the several locations that might become potential pests' habitat and some necessary precautions are needed for preventive measures in the future. Please find the following findings as below:

Location: Fire hydrant no. 26

Findings & Recommendation:

1) Spotted exposed PUB pit keyhole can collect rain water that might become potential mosquitoes breeding.
2) Kindly fill up the keyhole with sand particles for preventive measures.
