Preliminary Inspection

An inspection was conducted on the 17th December 2021 at the above school. In summary, no major pest issue was found during the time of inspection.

We would like to highlight at the several locations that might become potential pests' habitat and some necessary precautions are needed for preventive measures in the future. Please find the following findings as below:

Location: Fencing behind classroom 1.6

Findings & Recommendations:

1) Spotted lots of fallen and dried leaves that might become potential mosquitoes breeding and pests' harbourage area.
2) Advised to keep good housekeeping and clean up any fallen leaves on regular basis for preventive measures.

Location: Interceptor drain in front of Language room 2

Findings & Recommendations:

1) Spotted chocked drain filled with grass debris and stagnant water that might become potential mosquitoes breeding.
2) Advised to clean up the drain on regular basis for preventive measures.

Location: Level 1 electrical trunking area

Findings & Recommendations:

1) Spotted potential bat hiding place in between trunkings at some ceiling
2) We will keep monitor closely during the routine service.
